~Music with a Story~

2021 Composition Challenge
“THE COLORS OF RAIN”

Lisker Music Foundation (LMF) is a passionate non-profit organization which strives to support young artists by offering them the platform to showcase their brilliant abilities, while simultaneously infusing the community with world class music making. We are very excited to announce the **4nd Annual Composition Challenge!**

THE CHALLENGE

Compose a musical work based on a theme or story provided by LMF.
Work must be written for Piano Trio (violin, cello, and piano)

This year's theme is Rain.

Water is a building block of life – we are surrounded by it, as well as filled with it. Water is magically able to take multiple physical forms, be completely transparent, and at times appear like the most vivid painting imaginable embodying every color in the spectrum.

People react to rain in many different ways. It can be enchanting, meditative, frightening, paralyzing, depressing, and exhilarating. Some people hide from the rain, some people dance in it. Everyone has a memory of rain.

Nature also reacts to rain in a variety of ways – it can draw the most sensual smells from the woods or the grass – it can cause irreparable damage through flooding – and has the power to wash away even the largest of messes, both literally and figuratively.

This piece will be dedicated to one very special woman as her son said,

"In my mind, Roza's main attributes are depth, dignity, substance, and grace. The colorful beauty of autumn are the 'soft' overtone to how I would describe her".

In 2021 we would like to celebrate rain.

EXPLORING THE THEME

This year's theme leaves a lot of room for imagination, and for using your own personal style. You can take a literal approach with a scenario or image, and depict it through sound in the form of a tone poem. You can create movements that demonstrate different moments in a human's experience of rain. You can forget the literal, and assume the role of an impressionist – create music that evokes emotions linked to rain. These are just examples; the challenge is by no means limited to this list.

It is difficult to make water conform to one idea, that's why it makes the perfect subject for a challenge!
